

pulsFOG K-40

STATIONARY FOGGER

THE NUMBER 1 FOGGING MACHINE FOR USE WITH CROP PROTECTION OR DISINFECTION

Total weight	108 kg
Fog Capacity	60 - 150 ltr. / h
Fog range (free output)	120 metres
Volume combustion chamber	3 ltr.
Fuel Tank	20 ltr. (tank is detachable)
Solution Tank	2 x 50 ltr. (optional 100 or 150 ltr.)
Max. performance of engine	92 kW (125 hp, 79.200 kcal/h)
Starting device	Electric start 12 V
Dosing Nozzles	4 Fluid Nozzles, 2 Cooling Nozzles

FEATURES

- Bio System for temperature sensitive crop protection
- Automatic depressurizing valve on tanks
- complete stainless steel
- 3 carburetors

Big Capacity means Big Advantages

The biggest thermal fogging machine of its kind is now even better. With improved safety features and its widely known capacity and performance, the pulsFOG K-40 is the machine to help you to get the best out of your products.

The pulsFOG K-40 can disinfect up to 20.000 m³ per hour or treat 3 hectares with crop protection per hour. With this capacity you can deliver a uniform fog throughout the complete area, so every inch of surface gets the same treatment. The BIO system (water cooling) let you use biological crop protection. The revolutionary depressurizing valve makes operating the pulsFOG K-40 safer and more reliable.

The pulsFOG K-40 is being produced by Frans Veugen Bedrijfshygiene BV, Netherlands under licence held by Dr. Stahl & Sohn GmbH & Co. KG, Germany.
